Transform Your College with an Artificial Intelligence Enabled Education Platform

Innovation beyond the Classroom

✈ Informes@tkaix.com

Fuse Classroom is a digital school ecosystem for administrators, faculty, and students

The Fuse Classroom AI platform is transforming Colleges and Universities with tools designed for administrators, faculty, and students to take their school online. **Administrators** gain the ability to manage admissions, track student-level course progress, and maintain other core operations within the Fuse Classroom platform. **Faculty** can hold live classes, quiz their students, share helpful materials, and hold study sessions online. **For students**, the platform becomes a digital classroom, workbook, and discussion board. With our **Parent portal**, Parents can monitor their child's progress in their coursework. To improve the overall learning experience and ensure students get the support they need, our Platform leverages AI to monitor progress, send reminders, and recommend supplemental materials to students.

Additional AI Features

A mobile app to power on-the-go learning and school operations.

Personalized recommendations of study materials, based on student progress.

Visual indicators of how quickly a student is picking up the material.

Personalized notifications to make sure students stay on track with their studies, and faculty are notified when a student may need additional support.

Technology Knowledge AI Experience

Taking Colleges and Universities Online from Start to Finish

From creating a plan to transform your College or University to on-boarding students and faculty to Fuse Classroom, our education specialists are there every step of the way.

Assess Your Need

Our specialists work directly with Principals, Administrators, and Faculty to understand the needs of your College or University to build a plan for success.

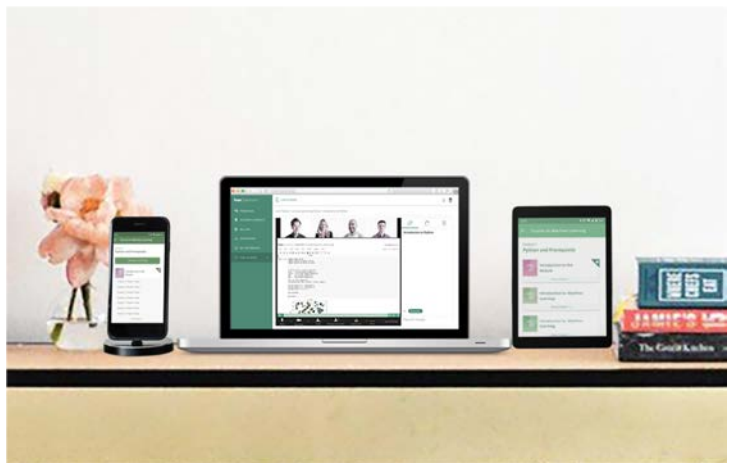

Create a Customized Plan and Conduct Training

We help to develop a strategic plan and curated training program specifically designed for your administrators, faculty, and students. In this phase, we help Colleges and Universities successfully adopt the Fuse Classroom Platform.

Ensure Successful Adoption

To provide consistent support to our College and University partners, our specialists ensure the highest quality online experience, even as needs change and evolve.
